

ANNUAL REPORT OF

Central Sheep Breeding Farm

HISAR (Haryana) - 125001, India

2021-22

Ministry of Fisheries, Animal Husbandry & Dairying

Department of Animal Husbandry & Dairying

Government of India

Krishi Bhawan, New Delhi-110001

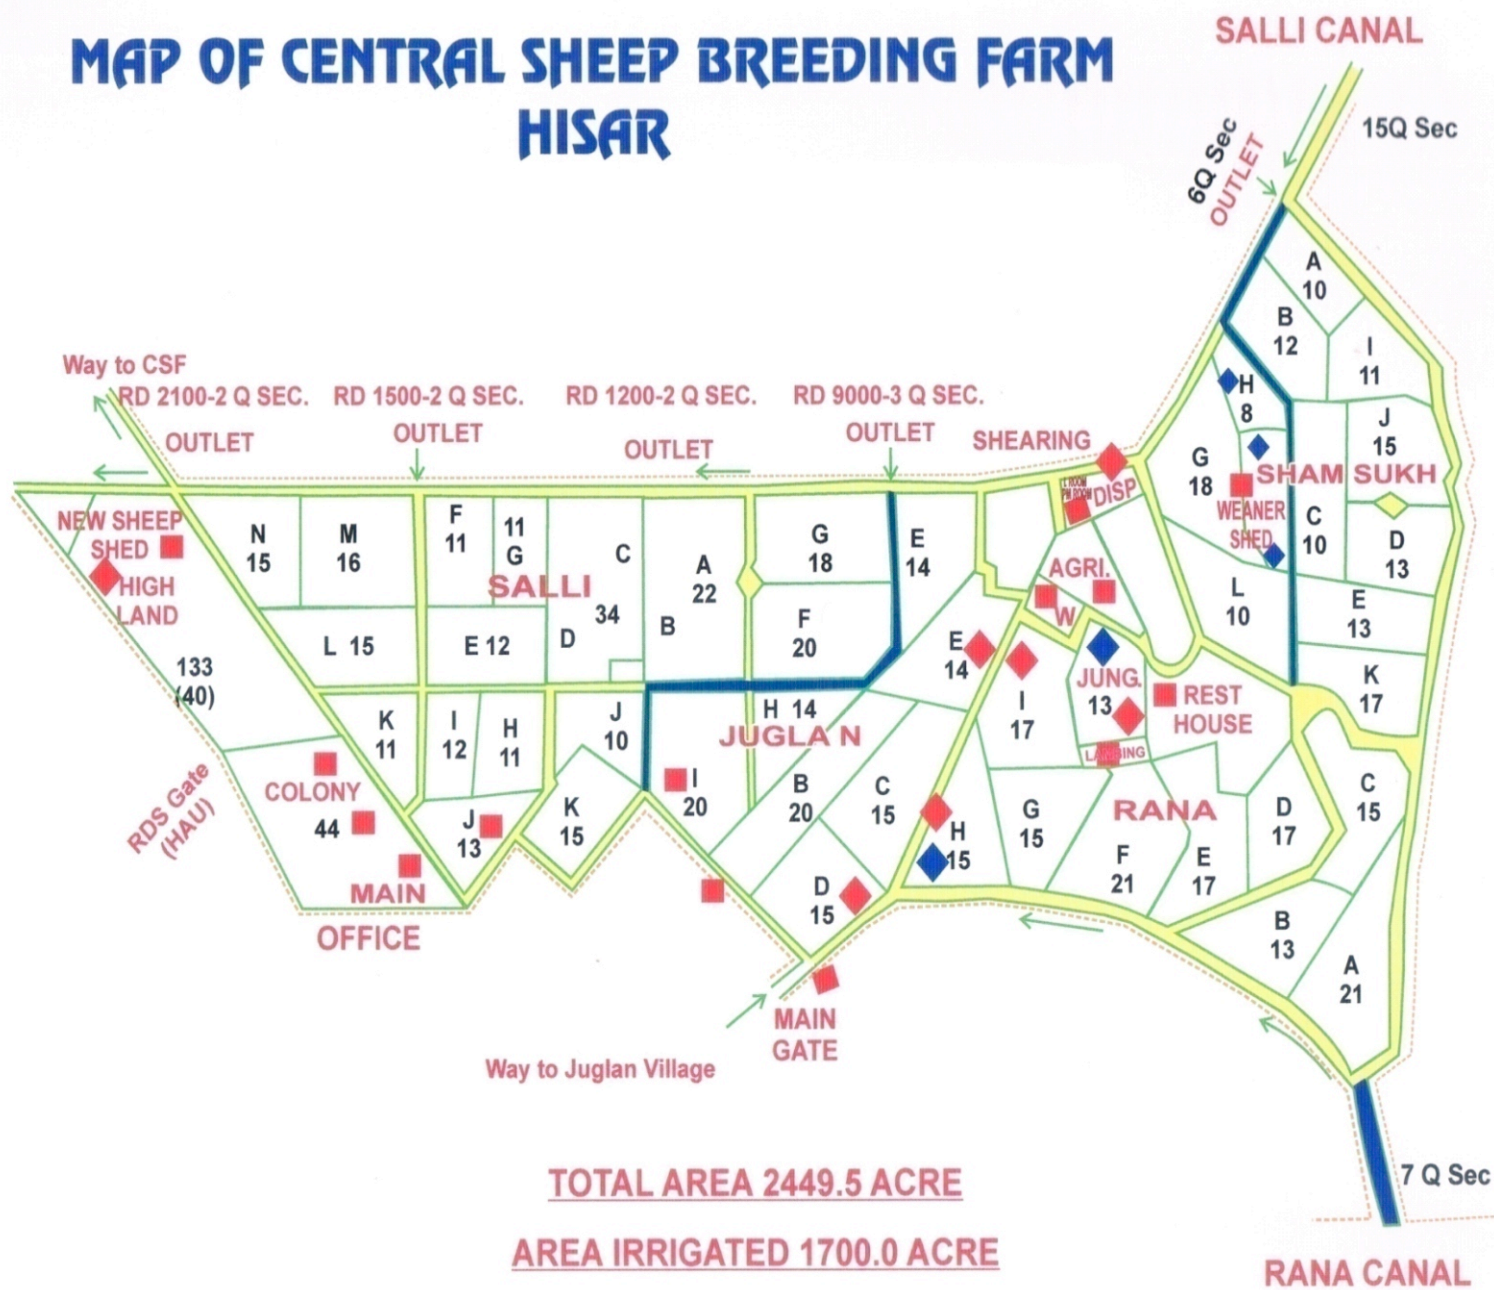

PREFACE

The country possesses about 148.9 million goats, one of the largest in the world and 74.3 million sheep during 2021 which account for 27.8% and 13.87% of total livestock population of India. Goats are framed throughout the world for being important source of milk, meat, fibre as well as of proteins along with their capability of adapting in different environmental conditions. The livelihood of large member of marginal Farmers, Landless Labourers and poor rural masses mainly depends upon sheep & goat rearing. Goat is affectionately labeled as "Poor Man's Cow" and sheep is labeled as "Mortgage lifter" for rural poors.

The Central Sheep Breeding Farm, Hisar is an unique farm of Department of Animal Husbandry & Dairying, Government of India, which contributes to render the technical resource person working with Animal Husbandry Department of different States. This Institute which came in existence in year 1969-70 as Indo-Australian project under Colombo Plan is paying vital role in distribution of elite rams & Beetal Bucks, Training in the field of sheep Goat management both for one week and one day & Mechanical Shearing training for one week trying hard to pay its assigned pivotal role in the field. The Annual Report of Central Sheep Breeding Farm, Hisar for the financial year 2021-22 is being exhibited here through this paper. Integrated pilot project was initiated for keeping Rabbits, Poultry, Goatery & Fishery to set an exemplary for backyard as a mixed farming system based on Moringa feeding for the poor masses. Also Artificial Insemination in Beetal Goats will be landmark for the farm as well as for Goat farmers for improvement in Beetal breed by selective breeding. Thus Sheep & Goat could also contribute significantly in the employment generation especially for rural youth.

(DR. A.K. MALHOTRA)
Joint Commissioner
CSBF, HISAR

INTRODUCTION

The Central Sheep Breeding Farm, Hisar was established in 1969-70 in collaboration with the Government of Australia under Colombo Plan on approximately 6477 acres of land, (now 2456 acres) leased by the Government of Haryana to upgrade the Nation's Sheep Flocks and improve the quality of wool.

Over 32,257 acclimatized breeding studs' rams, 1,331 Beetal Bucks and 4,,466 breeding ewes of exotic breeds and their crosses have been supplied till 2021-22.

OBJECTIVES

A total number of 500 Corriedale, 50 Merino, 310 Dorset Sheep were imported from Australia and 9875 Rambouillet Sheep were imported from America to establish the Sheep Breeding Farm with the following objectives:-

- Production of large number of cross bred rams & bucks for distribution to the sheep & goat raising areas of India. Presently farm produces Nali Rambouillet Cross, Sonadi Cross Corriedale & Beetal
- Setting up extension and training programme to ensure the best use of the ram & bucks produced.
- Development of suitable managemental system and requisite facilities for breeding and rearing under Indian conditions, using purely Indian resources.

LAND USE STATISTICS OF THE FARM

DETAILS OF LAND AVAILABLE:

TOTAL AREA	994.5 Hects
Cultivable Area:	806.0 Hects
Irrigated:	500.0 Hects
Unirrigated /Rainfed:	306.0 Hects.
(Under Cenchrus Natural Pasture)	
Uncultivable/Operational Complex	27.0 Hects.
(Sand Dumes, Low Lying & Jungle Area)	
Area Under Roads and Channels:	84.5 Hects
Area Under Buildings:	77.0 Hects.

TOTAL CULTIVABLE AREA BLOCKWISE:

Area	Rana	Sham	Juglan	Salli	Plot No.1	Total
Irrigated	152.00	82.00	166.00	60.00	40.00	500.00
Unirrigated	36.00	75.00	10.00	125.00	60.00	306.00
Total:	188.00	157.00	176.00	185.00	100.00	806.00

LOCATION:

The institute is situated at Hisar on Hisar-Chandigarh NH in Haryana State at latitude of 29°-10 North & longitude of 75°-46 East and at an altitude of 215.2 Mtr from Sea level.

CLIMATE:

Climate of Hisar is moderate. The average annual rainfall is about 300 to 350 mm. South West Monsoon normally begins in the first week of July & continue upto 1st week of September. The temperatures of different seasons are as under:-

Season	Minimum	Maximum
Summer	23° C	45° C
Winter	-1° C	23° C
