PREFACE

Sheep and Goat contributes greatly to the agrarian economy especially in arid, Semi arid and hilly region of our country. The livelihood of large percentage of marginal farmers, landless labourers and poor rural masses mainly depends upon Sheep and Goat rearing. Sheep and Goat accounts for significant meat production in the world along with milk, skin, wool and manure production. Thus the role of Sheep and Goat is key factor in improving the rural economy. That is why Sheep is affectionately labelled as "**mortgage lifter**" for rural poors whereas Goat is labelled as a "**poor man's cow.**"

The Central Sheep Breeding Farm, Hisar is an unique farm of Department of Animal Husbandry, Dairying & Fisheries, Govt. of India, which contributes to render the technical and managerial skill through training not only to the Sheep and Goat breeders but also to the technical resource persons working with Animal Husbandry Departments of different States. The Annual Report of Central Sheep Breeding Farm, Hisar for Financial Year 2016-17 is being exhibited here through this paper. This Institute which came in existence in year 1969-70 as Indo-Australian project under Colombo Plan is trying hard to play its assigned pivotal role in this field which still need to be explored further so that we may increase the protein contents in the diet of masses.

(Dr. L.C. Ranga)
(Director)

INTRODUCTION

The Central Sheep Breeding Farm, Hisar was established in 1968-70 in collaboration with the Government of Australia under Colombo Plan on approximately 6477 acres of land, (now 2456 acres) leased by the Government of Haryana to upgrade the Nation's Sheep Flocks and improve the quality of wool.

Over 29,214 acclimatized breeding studs' rams, 926 Beetal Bucks and 2,964 breeding ewes of exotic breeds and their crosses have been supplied till 2016-17.

OBJECTIVES

A total number of 500 Corriedale, 50 Merino, 310 Dorset Sheep were imported from Australia and 9875 Rambouillet Sheep were imported from America to establish the Sheep Breeding Farm with the following objectives:-

- Production of large number of cross bred rams & bucks for distribution to the sheep & goat raising areas of India. Presently farm produces Nali Rambouillet Cross, Sonadi Cross Corriedale & Beetal
- Setting up extension and training programme to ensure the best use of the ram & bucks produced.
- Development of suitable managemental system and requisite facilities for breeding and rearing under Indian conditions, using purely Indian resources.

LAND USE STATISTICS OF THE FARM

DETAILS OF LAND AVAILABLE:

TOTAL AREA	994.5 Hects
Cultivable Area:	806.0 Hects
Irrigated:	500.0 Hects
Unirrigated /Rainfed:	306.0 Hects.
(Under Cenchrus Natural Pasture)	
Uncultivable/Operational Complex	27.0 Hects.
(Sand Dumes, Low Lying & Jungle Area)	
Area Under Roads and Channels:	84.5 Hects
Area Uner Buildings:	77.0 Hects.

TOTAL CULTIVABLE AREA BLOCKWISE:

Area	Rana	Sham	Juglan	Salli	Plot No.1	Total
Irrigated	152.00	82.00	166.00	60.00	40.00	500.00
Unirrigated	36.00	75.00	10.00	125.00	60.00	306.00
Total:	188.00	157.00	176.00	185.00	100.00	806.00

LOCATION:

The institute is situated at Hisar on Hisar-Chandigarh NH in Haryana State at latitude of 29'-10 North & longitude of 75'-46 East and at an altitude of 215.2 Mtr from Sea level.

CLIMATE:

Climate of Hisar is moderate. The average annual rainfall is about 300 to 350 mm. South West Monsoon normally begins in the first week of July & continue upto 1st week of September. The temperatures of different seasons are as under:-

Season	Minimum	Maximum
Summer	23 C	45 C
Winter	4 C	23 C
